Profile Overview

Background

Joshua Chen has experience in all parts of the Software Development Lifecycle, from design, build, test, to production support. He has helped clients translate business requirements to technical specifications.

He has designed and implemented test cases and logged defects in test management tools. He has collaborated with team leads for reporting and metrics using QuickSight and Athena for more detailed analysis into contact center data. He has troubleshooted technical issues in contact center agents' environments. He has developed scripts to coordinate SMS/email messaging campaigns and created code pipelines to push from development environment to production environment.

Joshua is currently an AWS Systems Architect creating backend solutions for automation of SMS/email messaging.

Strengths & Specialties

Technical Experience

- Amazon Connect, Lambda, Athena, QuickSight
- Agile/Scrum Methodologies, Git
- Java, Selenium, Python, JavaScript

Functional Experience

- Functional testing, Automation testing
- Code deployments, version control
- Lambda integration with Amazon Connect
- Database queries for reporting

Certifications

- AWS Solutions Architect Associate
- AWS Cloud Practitioner

Selected Experiences

Accenture – AWS Systems Architect

February 2023 – Present

- Developed Lambda functions in Python and JavaScript to automate sending out status reports and coordinate SMS messaging campaigns to 1000+ users
- Managed Continuous Integration / Continuous Delivery pipeline to sync code with development and production environments
- Provided technical support for 50+ call center agents in Amazon Connect

Accenture - AWS Systems Architect

February 2022 – December 2022

- Designed Amazon Connect contact flows to automate routing of callers to specific workflow queues
- Provided technical support for call center agents in Amazon Connect

Accenture - AWS Systems Architect

August 2021 – February 2022

- Created data visualizations in QuickSight with Athena as back-end for enhanced reporting and metrics
- Developed contact flows in Amazon Connect and configured items such as users, queues, and routing profiles
- Created real-time and historical metrics reports in Amazon Connect
- Assisted call center partners in troubleshooting Amazon Connect issues and handling data requests for recordings

Accenture - AWS Systems Architect

April 2020 – July 2021

- Diagnosed and troubleshooted software and hardware problems and helped call center partners install applications and programs
- Developed Amazon Connect contact flows
- Deployed an Angular app to assist call center partners with navigating their scripts
- Developed reports and metrics for team leads
